Profile

Software Engineer with over 10 years of experience, focused on backend solutions.

- **Java / Spring Boot – 8 years**
- Angular / Javascript – 3 years
- Android / iOS – 2 years
- Tech Leadership – 1 year
- Event Driven – Kafka, RabbitMQ – 4 years
- Database – MongoDB, MySQL, Oracle – 10 years

I'm passionate about solving business problems, talking to stakeholders, mentoring entry level people and making choices that matter.

Some proud Achievements:
- Achieved 100% reduction in mobile application data loss (from 20%) as the sole developer.
- Significantly improved dashboard page load time from 10 minutes to 1.5 seconds
- Created a drag and drop smartphone case creator page as the solo dev in 2014.

Companies I have acted:
Dell, Philips, ADP, Caixa Econômica (big bank of Brazil), Ultragaz (big gas company) and Ambev (biggest beer company)
